Neem National Research Council 1992-02-01 The neem tree, one of the most promising of all plants, may eventually benefit every person on the planet. Probably no other plant yields as many varied products or has as many exploitable by-products. Indeed, as foreseen by some scientists, this tree may usher in a new era in pest control; provide millions with inexpensive medicines; cut the rate of population growth; and perhaps even reduce erosion, deforestation, and the excessive temperature of an overheated globe. On the other hand, although the enthusiasm may be justified, it is largely founded on exploratory investigations and empirical and anecdotal evidence. The purpose of this book is to marshal the various facts about this little-known species, to help illuminate its future promise, and to speed realization of its potential.

Art & Ecology Now Andrew Brown 2014 Eco awareness has had an enormous impact across all cultural and political spectrums, not least in the art world. This accessible and thought-provoking book is the first in-depth exploration of the ways in which contemporary artists are confronting nature, the environment, climate change and ecology. Organized into six chapters, the book moves through the various levels of artists engagement, from those who act as independent commentators, documenting and reflecting on nature, to those who use the physical environment as the raw material for their art, and those committed activists who set out to make art that transforms both our attitudes and our habits. More than 300 illustrations feature the work of 95 artists and art collectives from all over the world, including The Artist as Family, Nyaba Leon Ouedraogo, Yao Lu, Tue Greenfort, Eva Jospin, Ravi Agarwal, Nadav Kander, Naoya Hatakeyama, Tattfoo Tan, Berndnaut Smilde, Simon Starling, and Jennifer Allora and Guillermo Calzadilla.

Remaking a Life Celeste Watkins-Hayes 2019-08-20 In the face of life-threatening news, how does our view of life change—and what do we do to transform it? *Remaking a Life* uses the HIV/AIDS epidemic as a lens to understand how women generate radical improvements in their social well being in the face of social stigma and economic disadvantage. Drawing on interviews with nationally recognized AIDS activists as well as over one hundred Chicago-based women living with HIV/AIDS, Celeste Watkins-Hayes takes readers on an uplifting journey through women's transformative projects, a multidimensional process in which women shift their approach to their physical, social, economic, and political survival, thereby changing their viewpoint of "dying from" AIDS to "living with" it. With an eye towards improving the lives of women, *Remaking a Life* provides techniques to encourage private, nonprofit, and government agencies to successfully collaborate, and shares policy ideas with the hope of alleviating the injuries of inequality faced by those living with HIV/AIDS everyday.

The New Landscape Declaration Landscape Architecture Foundation 2017 On the eve of its 50th anniversary, the Landscape Architecture Foundation asked a diverse group of the world's leading landscape architects to reflect on the last half-century and present bold ideas for what the discipline should achieve in the future. Well beyond the public conception of the profession as "gardener" or "park designer," these landscape architects discussed their role in addressing weighty issues like climate change, urbanization, management of vital resources like water, and global inequities. The New Landscape Declaration brings together their ideas and experiences in essays from thirty-three preeminent thinkers, including: James Corner, designer of the High Line in New York City Randy Hester, founder of the modern participatory design movement in landscape architecture Kate Orff, researcher, innovator, and design activist Martha Schwartz, acclaimed landscape architect and artist turned activist Carl Steinitz, Geodesign pioneer Richard Weller, prolific design researcher and author Kongjian Yu, celebrated designer, dean, and author from the People's Republic of China The New Landscape Declaration asserts the vital role of landscape architecture in solving the defining issues of our time. Relevant to designers across the globe, the ideas cross disciplinary boundaries and challenge current silos of thought and practice, underscoring the need to diversify, innovate, and create a bold culture of leadership, advocacy, and activism.

Well-known archaeologist Barbara Little addresses these key questions for introductory students in this concise, inexpensive, and well-written text. Little covers the goals of historical archaeological work, the kinds of questions it asks, and the ethical and political concerns it raises. She shows what historical archaeology can provide that neither of its parent disciplines can offer alone. Little offers brief snapshots of key American sites: Jamestown, Mission San Luis, West Oakland, the African American Burial Ground, and

the Garbage Project, among others. And she shows how historical archaeology is inextricably linked to public education, justice issues, and our collective understanding of the past. As an introductory guide for historical archaeology and similar courses, or as thought-provoking reading for professionals, this volume is unmatched in quality and scope.

The New Welfare Bureaucrats Celeste Watkins-Hayes 2009-09-15 As the recession worsens, more and more Americans must turn to welfare to make ends meet. Once inside the agency, the newly jobless will face a bureaucracy that has undergone massive change since the advent of welfare reform in 1996. A behind-the-scenes look at bureaucracy's human face, *The New Welfare Bureaucrats* is a compelling study of welfare officers and how they navigate the increasingly tangled political and emotional terrain of their jobs. Celeste Watkins-Hayes here reveals how welfare reform engendered a shift in focus for caseworkers from simply providing monetary aid to the much more complex process of helping recipients find work. Now both more intimately involved in their clients' lives and wielding greater power over their well-being, welfare officers' racial, class, and professional identities have become increasingly important factors in their work. Based on the author's extensive fieldwork in two very different communities in the northeast, *The New Welfare Bureaucrats* is a boon to anyone looking to understand the impact of the institutional and policy changes wrought by welfare reform as well as the subtle social dynamics that shape the way welfare is meted out at the individual level.

Bi Any Other Name Lani Ka'ahumanu 2015-09-23 "I am part of the generation that came of age when *Bi Any Other Name* was already in print. This groundbreaking anthology gave me the language, courage and sense of community I needed as a young queer woman." —Daisy Hernández, *A Cup of Water Under My Bed* The 25th Anniversary Edition

Bi Any Other Name: Bisexual People Speak Out first debuted in 1991. This groundbreaking book helped catalyze a national movement for bisexual identity, justice and equality. Often dubbed "the bisexual bible," *Bi Any Other Name* was on Lambda Book Review's Top 100 GLBT Books of the

20th century and became a beloved reference text in many classrooms, doctors' offices, libraries, and pulpits. A 2007 Mandarin translation was published in Taiwan. The new 2015 introduction of this book updates readers to the enormous changes the past quarter century has brought – for bi people, the larger society and the sexual rights and liberation movement of which we are a part. When did you know? How did you come out? What was your experience? The coming out stories in this book speak to the many ways bisexuals embrace realities outside rigid either/or categories throughout the passage of our lives. Everyday stories of women, men, transgender bisexuals, teenagers to octogenarians, from many different cultures and family arrangements. The fierce truth of these lives made visible puts a check on bisexual erasure, exposing the binary constructions of gay/straight and male/female as oversimplifications that reduce spectrums to mere opposites. Caught between the mainstream culture's persistent discounting of bisexuality, the sensationalizing characterizations presented in media, and the sexual liberation movement's continual disregard of bisexuality as a serious identity, bisexual people are often not seen or heard when they speak out. There is a vital need for these earnest voices to be heard in the new century. Enormous cultural changes have occurred in the past 25 years, yes, but understanding bisexualities has just begun.

Cutting Loose Ashton Applewhite 2017-06-20 For women contemplating divorce or for those who have already divorced, Ashton Applewhite's insightful book sheds light on what to consider before making the decision to end your marriage, how to protect yourself—both financially and emotionally—and how much your life will change. One out of every two modern marriages ends in divorce, and 75 percent of those divorces are initiated by wives. Author Ashton Applewhite is one of these women, having sued for divorce after enduring an unfulfilling ten-year marriage. *Cutting Loose* is an essential resource for women who want to leave their marriage but fear the consequences. Shattering the media-generated image of the lonely, deprived and financially strapped divorcee, Applewhite provides a much needed reality check. *Cutting Loose*

introduces 50 women, varying in age, race, class and predicament, who have thrived after initiating their own divorces. Their fears of financial, emotional and romantic ruin were never realized; on the contrary, their lives improved immeasurably, and their self-esteem soared. Cutting Loose also answers the crucial questions: How do you finally decide to make the big break? What is getting divorced really like? What are the shortcomings of the legal process? What about custody and child support? Financial and emotional survival? And how does a woman's self-image change during and after divorce? "Ending any kind of oppression takes belief in self. Cutting Loose offers moving evidence of how such belief works, whether in a relationship or walking the road alone. Perceptive, realistic, and wise, the book is of enormous practical value to both women and men who aspire to more equal and fulfilling relationships."—Laura Day, author of Practical Intuition

A Two-Colored Brocade Annemarie Schimmel 2014-02-01 Annemarie Schimmel, one of the world's foremost authorities on Persian literature, provides a comprehensive introduction to the complicated and highly sophisticated system of rhetoric and imagery used by the poets of Iran, Ottoman Turkey, and Muslim India. She shows that these images have been used and refined over the centuries and reflect the changing conditions in the Muslim world. According to Schimmel, Persian poetry does not aim to be spontaneous in spirit or highly personal in form. Instead it is rooted in conventions and rules of prosody, rhymes, and verbal instrumentation. Ideally, every verse should be like a precious stone--perfectly formed and multifaceted--and convey the dynamic relationship between everyday reality and the transcendental. Persian poetry, Schimmel explains, is more similar to medieval European verse than Western poetry as it has been written since the Romantic period. The characteristic verse form is the ghazal--a set of rhyming couplets--which serves as a vehicle for shrouding in conventional tropes the poet's real intentions. Because Persian poetry is neither narrative nor dramatic in its overall form, its strength lies in an "architectonic" design; each precisely expressed image is carefully fitted into a pattern of linked figures of speech. Schimmel shows that at its heart Persian poetry transforms the

world into a web of symbols embedded in Islamic culture.

Landscape Bridges Ifengspace 2015-04-01 Bridges are at once a departure and an arrival, an opportunity to cross over to a new land and begin again. Perhaps that is why they are imbued by such magic, stirring our imagination through the possibilities of renewal as well as their myriad forms. Landscape Bridges showcases some of the most innovative designs of recent years for pedestrian and bicycle bridges and elevated footpaths. Whether over water, earth, road or vegetation, many of the same design challenges apply, challenges that are met and vanquished by these sometimes award winning designs. While categorized by main material component iron, wood and hybrid the permutations of form are endless from the highly organic or sinuous, to modern geometric and linear forms. Some connect parks and public spaces, others residential and commercial zones. The Alexandra Arch & Forest Walk in Singapore allows pedestrians to walk among the treetops, while the Moses bridge in the Netherlands literally parts the water ahead of its visitors. Prepare to be enthralled.

Landscape Perception Amita Sinha 1995 Since its inception, the *Journal of Environmental Psychology* has demonstrated its pre-eminence through publishing original, innovative papers. By bringing them together in one volume, ready access has been provided to the first-hand accounts of a range of explorations that are central to the growth and development of environmental psychology itself. This collection of papers from the journal provides a convenient, first-hand account of the studies that environmental psychologists have conducted in clearing the ground for explorations of the experience of landscapes. It encapsulates the actual studies that form the basis of this rapidly growing area of environmental psychology, thus providing new students and experienced researchers with direct examples of the actual studies that have been conducted. For psychologists schooled in laboratory research the natural landscape may seem to be the last frontier that still has to be conquered. But many other disciplines have been at home in these wilder regions for a number of years. Those geographers, landscape architects, biological ecologists, and others will find the present volume a helpful introduction to the opening stages of psychological forays into areas that they may possibly consider their own inviolable domain. The initial papers in a new area of study are often crucial to the development of that field. By bringing the original papers together in one volume it is possible to gain a detailed awareness of the contributions these studies are making to our understanding of the human significance of nature.

Design, Education and Pedagogy Leon Benade 2020-06-30 This book explores the increasing emergence within educational institutions, such as schools and universities, of large, flexible spaces whose design is underpinned by cutting-edge principles and technologies. These changes in educational facilities have spawned a range of new terminology. For example, terms such as 'modern learning environments', 'innovative learning environments', 'flexible learning environments' and 'new generation learning spaces' have gained currency in recent years. The development of flexible learning spaces, while suggesting design creativity, also points to the desire by governments to influence educational outcomes. The displacement of traditional classrooms also presupposes varied teaching and learning approaches, calling on teachers to work in teams and to de-privatise their practice into spaces that are transparent and porous. These developments in the area of educational facilities suggest critical questions regarding the origins and purposes of these changes in educational thinking and practice. Questions must also be raised about the links between conception, design intention and spatial

practice. Underlying these questions are competing views on the design of education facilities. This volume gathers a range of international authors who theorise these questions at the intersection of building design, pedagogy and educational policy. The chapters in this book were originally published in the journal *Educational Philosophy and Theory*.
